Subject: **Your application for funding under LIFE2017 Integrated Projects
LIFE 17 IPC 006
"Boosting the implementation of adaptation policy across Greece"**

Dear Applicant,

I am pleased to inform you that the European Commission has completed the evaluation of the concept notes submitted for the LIFE Integrated Project proposals 2017 Climate Action sub-programme. Your concept note (referred to above) is considered to comply with the criteria laid down in the corresponding *Guide for the evaluation of LIFE Integrated Project proposals 2017 Climate Action sub-programme*. You are therefore invited to submit your full integrated project (IP) proposal by **16:00 on 17 April 2018**. Please see chapter 1.8 of the *Guidelines for applicants LIFE Climate Action Integrated Projects 2017* for the relevant instructions.

Please note that 6 concept notes have passed this stage successfully and have been invited to submit their full IP proposal, with a total requested EU contribution of EUR 50 million. I draw your attention to chapter 1.4 of the Application guide: "The total indicative budget available for Climate Action Integrated Projects in 2017 is about EUR 30 million" This indicative budget would allow us to finance only a limited number of IPs, based on the average contribution of EUR 7-10 million indicated in the application guide. It is therefore unlikely that we would accept an EU contribution significantly exceeding the average indicated.

As foreseen in the *Guide for the evaluation*, you will have the opportunity to participate in a **written question and answer phase**, during which you can submit questions related to the preparation of a full proposal. You may submit your questions via e-mail to EASME LIFE ENQUIRIES EASME-LIFE-ENQUIRIES@ec.europa.eu during the period **between 4 January and 28 February 2018**. It would be appreciated if you could group your questions and send them in batches. Questions should mainly - but not exclusively - concern clarifications of the guidelines or the related processes. We would not, in general, provide you with specific guidance to help you orient or improve your proposal.

At the end of this phase, the Commission will render public the questions and answers in an anonymous manner, to assist equally all applicants. This information will be available on the LIFE 2017 call for proposals page under "FAQ IPs":

<http://ec.europa.eu/environment/life/funding/>.

You will find in the annex to this letter our general comments together with specific comments on your concept note.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Angelo Salsi". The signature is written in a cursive style with a large initial 'A'.

Angelo Salsi

Annex

1. General comments to all applicants

1.1 Complementary actions, mobilisation of funds

With a view to the fact that the adoption process of all RDPs and OPs was still ongoing at the time of the submission of the CNs (and is still ongoing now) but are expected to be finished shortly, all applicants should revisit the issue of available complementary funding sources and include in the full proposal those funds that can be genuinely mobilised as foreseen in Chapter 1.4 of the Application guide.

In this respect, note has been taken of the large difference in the amount of complementary funds included in the concept notes, indicating that the applicants may have different understanding of the complementary funds and their mobilisation. We therefore draw the attention of all applicants to the provisions of the above mentioned Chapter 1.4, with particular attention to the requirements that:

- *"Complementary actions shall always implement **the same large scale plan or strategy** that the Integrated Project is targeting."* Note that actions not meeting this condition will not be taken into account during the assessment and scoring of the proposal.
- *"The quality of the coordination with other funding mechanism(s) and the level of mobilisation of complementary funds as well as the likelihood of their actual mobilisation and their functional link to the plan to be implemented will have an impact on the evaluation of the **EU added value** of the IP."* The applicants should pay attention to this criterion and provide well substantiated arguments especially in case none of the IP beneficiaries are involved in the management and/or granting of the funding mechanism in question and hence have no actual influence on the use of those funds.

1.2 Project period

In order to ensure a sufficient time frame to implement all actions, applicants are encouraged to foresee sufficient buffer periods, in particular in relation to all necessary administrative procedures and to actions with innovative and demonstrative elements.

1.3 Implementation of the targeted plan

Applicants are reminded that the IP must be clearly designed with the aim of creating the conditions for the full implementation of the Plan. The IP shall include strategic actions to catalyse a process and mobilise supplementary commitments and funding that will lead, in due time, to the full implementation of the plan/strategy. The IPs should therefore be designed in a way to address this long term objective. Under these conditions, applicants are invited to verify whether LIFE 'traditional' grant funding is not a more appropriate funding source for their project.

2. Specific comments on your concept note

- Complementary actions could be enhanced to fully deliver the full implementation of the strategy.
- More details on the concrete pilot actions proposed will be desired in the full proposal. The number of relevant actions (including complimentary) could be enhanced.
